Election/Restrictions

It appears that the Applicant's representative overlooked claim 88 as still pending in the application. And as such, the restriction applied below includes claim 88.

The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 39-41, 43, 44, 46-49, 51, 52 and 54-63 are drawn to a free stall divider, classified in class 119, subclass 523.
- II. Claims 73-88 are, drawn to a method of dividing an open area into separate free stalls for animals, classified in class 119, subclass 523.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to create individual office space to provide cubicles for a clerical support staff.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Christopher Austin on 12-10-2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3643

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
